Answer key — Random 1–5 experiment

#	Problem	Answer
1	Predict how many times each number will appear in 50 picks	10 each
2	Record your tally for 1, 2, 3, 4, 5	
3	Which number appeared most? Least?	
4	Combine the class results — are they closer to 20% each?	Usually closer with more picks
5	Why might one small experiment look uneven?	Random variation
